

# John Yaglenski

**Current Spanish Wells BOD Member  
Running for Re-Election**

I've had the pleasure of serving Spanish Wells Club for the past three years as your representative on the Board of Directors. During this time, I've worked with some of the best people around including staff, members and my fellow directors to enhance the overall experience of the club we love.

I've lobbied for fiscal responsibility, paying off existing debt, improving facilities and increasing social events that bring us all together. To that end, I championed the Men's restroom renovation turning it from something out of a haunted house to a bright & clean space (even doing some of the work myself). I also innovated/championed our annual Salty Dog cruise on the Calibogue Sound and continue to organize this highly popular event each year. I've consulted with Logan and Bill on matters of technology, vendor selection and improving our communication, among other things.

For those unfamiliar, my background is quite varied, which lends itself well to a position like this. I'm currently the Director of Communications & IT for IEEE-USA, the world's largest technical professional society and have been with the company for 22+ years. I also am the Founder of INTERCOT.com – one of the internet's largest and oldest Disney Vacation Planning websites, which has been online since 1997.

I currently serve as President of the Little Harbour Manor POA Board and prior to that was the treasurer for the Oak Marsh POA on Hilton Head. Before moving to the island five years ago, I was a board member in one of the largest planned communities in Maryland which had an annual budget in the millions of dollars. I served for 2 terms (a total of 4 years) and also spearheaded the effort to bring its first community center and 2 pools/clubhouse online as the founding pool and rec chair.

I previously worked in the internet industry for the 4<sup>th</sup> largest ISP in the U.S. as GM of Web Development and served as Operations Director for one of the largest Century 21 real estate offices in the world managing finances (comptroller) and heading up their residential property management department as a licensed agent.

On the personal side, I'm happily married to my wife Stacey since 1991 and have two fantastic grown sons Michael and Andrew. I'm a college hoops fanatic which naturally follows being a University of Dayton graduate (Go Flyers), a Disney nut, amateur photographer, tech junkie, Christmas light show enthusiast, classic arcade game collector and Thyroid Cancer survivor.

I want to thank everyone at the club for "Welcoming Us Home" after we became members of the family and would appreciate having your vote to continue giving back, by serving your interests with another term on the Spanish Wells Club Board of Directors.
